BUILT-IN REFRIGERATOR COLUMNS  
BUILT-IN FREEZER COLUMNS  
BUILT-IN WINE COLUMNS

---

DESIGN GUIDE

## **BUILT-IN COLUMNS**

These premium refrigerators, freezers and wine columns are masterpieces of design and technology. Their stylish appearance reflects close attention to detail and high-quality materials, inside and out. The stainless steel front and panel ready doors are mounted with state-of-the-art engineered lift-and-swing hinges that give the perception of a weightless range of motion. Versatile installation options make it possible to bring together elegant configurations of the refrigerator, freezer and wine columns in any desired width. All three columns work in harmony with handles and finishes available for every Series.

## Installation requirements

### INSTALLATION

All Bertazzoni columns can be installed in a standard 635mm (25") depth cutout.

Finish the edges of the opening because they may be visible when the door is open.

For a built-in installation, to cover gaps between the appliance and the adjacent cabinets, special side profiles are factory-installed and covering frames are provided with the product.

**For instructions of product combinations please see the Multiple Installation Section (page 58).**

### CABINET REQUIREMENT

Installation of the appliance must be performed in accordance with the provisions of applicable legislation.

Be sure that support of this appliance is perpendicular to the front facing of the wall or cabinet before you perform the installation.

The floor must be flat and must be capable of supporting the weight of the appliance when in use.

<b>Required floor support</b>	695 kg (1532 lb)
-------------------------------	------------------

### ELECTRICAL REQUIREMENT

The installation must comply with all applicable electrical codes. A properly - grounded horizontally - mounted electrical receptacle should be installed.

Place the electrical supply flush with the back wall and within the shaded area shown in the illustrations.

Placement within the opening may require additional cabinet depth.

### PLUMBING REQUIREMENTS

Bertazzoni Freezer Columns are provided with a water filter assembly which must be mounted outside the unit.

The appliance must be connected only to a potable water supply system.

To connect to water supply system (for appliances equipped with ice maker) a 6,4mm (1/4") waterline with accessible shut-off valve must be supplied.

The solenoid connection on the appliance is 19mm (3/4") diameter but is metric threaded (NPT).

The system pressure must be between from 8 PSI to 75 PSI (between 0.5 bar and 5 bar). Different pressures can cause malfunctions or leaks in the water system.

For information on how to purchase the water filter, please see Use and Maintenance Manual.

Dimensions in parentheses are millimeters unless otherwise specified.

# 45cm (18") Freezer Column Panel Installed

## Installation requirements

### INSTALLATION

All Bertazzoni columns can be installed in a standard 635mm (25") depth cutout.

Finish the edges of the opening because they may be visible when the door is open.

For a built-in installation, to cover gaps between the appliance and the adjacent cabinets, special side profiles are factory-installed and covering frames are provided with the product.

**For instructions of product combinations please see the Multiple Installation Section (page 58).**

### CABINET REQUIREMENT

Installation of the appliance must be performed in accordance with the provisions of applicable legislation.

Be sure that support of this appliance is perpendicular to the front facing of the wall or cabinet before you perform the installation.

The floor must be flat and must be capable of supporting the weight of the appliance when in use.

<b>Required floor support</b>	315 kg (694 lb)
-------------------------------	-----------------

### ELECTRICAL REQUIREMENT

The installation must comply with all applicable electrical codes. A properly - grounded horizontally - mounted electrical receptacle should be installed.

Place the electrical supply flush with the back wall and within the shaded area shown in the illustrations.

Placement within the opening may require additional cabinet depth.

For detailed installation specifications consult the multiple installation requirements page or each single product installation manual.

**HERITAGE SERIES  
HERHKCOL**

**BERTAZZONI HANDLES  
DRILLING ON RIGHT SWING DOOR**

**BERTAZZONI HANDLES  
DRILLING ON LEFT SWING DOOR**

## HANDLE INSTALLATION ON CUSTOM PANELS

In case a custom panel is to be mounted on any of the models listed below with Bertazzoni handles, it will be necessary to install M5 x 0.8 mm brass tapping inserts in order to secure the handle properly on the custom panel. Recommended drill bit size to drill the pilot hole is 9,5mm (3/8”).

Do not use a power tool to mount the inserts. Installation of the inserts with improperly calibrated power tools risk damaging the panels.

Dimensions in parentheses are millimeters unless otherwise specified.

# Toekick Panel

**Part number 901560**

**Part number 901561**

Installation of multiple column units with a continuous cabinet toe kick are possible. Details are provided in the Bertazzoni Columns installation manual
