

60 cm Built-in Panel Ready Dishwasher

Heritage Series

DW60S3ICPDV

The Bertazzoni 60 cm fully integrated dishwasher is large enough for up to 14 place settings on three racks. Touch controls with LED display let you access 6 programmes from Eco to Self-cleaning. It's insulated to keep noise levels at 47db. Automatic door opening at the end of the washing cycle speeds up the drying process.

The advanced motor features a turbidity sensor that automatically adjusts the wash cycle duration based on the soil level of the dishes. This ensures optimal cleaning performance while saving time and energy.

Designed with a hybrid tub, it features stainless steel sides and top for exceptional durability and corrosion resistance, while the plastic bottom improves insulation and reduces noise for a quieter washing experience.

This dishwasher model is equipped with six fixing points, including two on each side and two on the top, ensuring a stable and precise installation.

Featuring a Floor Projection Status Light, it provides real-time updates on the wash cycle status by projecting a light signal onto the floor.

It is new C energy rated.
