

60CM Gas Built-in Oven 5 functions Modern Series

F605MODGKXS

The Bertazzoni Modern Series 60cm built-in gas oven with gas grill has a 76 litre capacity best-in-class cavity. 5 functions make it ideal for cooking fish and roasting meat as gas ovens reach a high temperature quickly, which helps to seal the food, making it crispy on the outside while retaining moisture inside. Temperature adjustments are instant, making it very precise and controllable. The fan-assisted mode ensures an even heat distribution for single and multi-level roasting and baking without flavour crossover. The non-convection mode is excellent for baking cakes. The oven is easily controlled by metal knob with soft opening door for ease of use. The door is double-glazed for safety and efficiency. Available in stainless steel.

Specifications

Features

Oven cavity

Size	60 cm
Oven fuel	gas with gas grill
Oven type	fan assisted gas
Oven grill type	gas
Oven functions	bottom bake / convection / convection grill / grill / oven light
