

78 cm Induction Hob with Metal Frame, 4 cooking zones, TFT display

Modern Series

P78411M37XT

This 78 cm induction cooktop features 4 induction zones. It offers 9 power levels, each equipped with a dual booster for even faster cooking performance.

The new TFT display provides clear, intuitive step-by-step guidance during cooking. The control interface, invisible when off and brightly illuminated when active, perfectly embodies Bertazzoni's philosophy of discreet elegance and intuitive functionality. The Multi-zone function allows you to combine multiple cooking zones into one larger area, making it ideal for oversized pots or griddles.

Bertazzoni's latest induction cooktops deliver a streamlined cooking experience with the help of the Bertazzoni Assistant, which includes five customizable automatic programs. A temperature sensor located at the center of each cooking zone ensures flawless results with minimal effort.

With a maximum output of 3.7 kW in Boost mode, the cooktop brings water to a boil faster and reaches higher temperatures—perfect for searing meat. The highly flexible induction elements also allow for precise low-heat cooking, maintaining stable temperatures and offering ultra-quiet operation for maximum comfort.

Featuring an exclusive metal frame pre-installed on the cooktop, available in elegant Stainless Steel, Carbonio, or Gold finishes.
